VIHTECH

We Are The Best And Leading Web Services
Provider In Melaka Since 2008

Corporate Information

In year 2008, VISHTECH (IP0273354-M) began offering web services such as domain name registration, web hosting services, web designing services, search engine optimizations and online marketing services to the masses. We quickly learned that it wasn't all about servers and technology. Sure, it's very important for us to be prepared, knowledgeable and technical; but what's really important is people.

That's the reason we are in this business - to provide a world class service and support to real people around the world. We realize that you need someone to speak to you on a human level and to understand your business needs to reach your goals. We understand people and we believe that is what makes us different.

In the 10 years of the journey from the day our business was registered, the quality works are well honored by our customers. Now we own the title as The Best and Leading Web Services Provider in Melaka. Day by day the numbers of clients keep on increasing, therefore we have incorporated our enterprise business to VISHTECH MX SDN. BHD. (1130235-V) and have expanded our business to IPOH, KL and JB.
